White concentrate

General Information

| | |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Article number: | WK1-700 |
| Usage: | Physiologically harmless, air permeable protective paint for bushes and trees. Protects the young shoots on fruit trees and berry bushes. |
| Characteristics: | Fast drying White concentrate with high covering power. Free from solvents and softeners, biologically degradable. |
| Basis: | Copolymer, synthetic resin dispersion approved for the use in the food and packaging industry, titanium dioxide and natural fillers. |

Physical properties

| | |
|----------------|-----------------------------------|
| Colour: | white |
| Gloss level: | mat |
| Density: | Approx. 1,24 g/ml |
| Consumption: | up to 50 g per m ² |
| Covering rate: | at least 20 m ² per kg |

Application

| | |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Application: | Please pay attention to a uniform layer that is free of gaps. Only use clean working equipment. |
| Substrates: | Young buds and shoots in orchards and berry plantations. |
| Thinning: | Depending on the chosen application: 1:0.5 to 1:5 with water |
| Processing equipment: | Conventional mechanical or manual spraying equipment. Seedlings can also be dipped. |
| Processing temperature: | Dry and frost-free weather conditions during the time of drying. Not less than + 5° C object resp. substrate temperature. |
| Clean-Up: | Immediately in the wet state with water, if necessary in addition with a household detergent. |

White concentrate

Consignment & Storage

| | |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Packaging: | Plastic canister with 6 kg or 15 kg contents |
| Storage: | Keep dry and cool, but frost free! The product can be stored for a minimum of 9 months when kept sealed in the original container. Once the container is opened or diluted, use it soon and keep it tightly closed for storage. |
| Disposal: | Completely emptied containers can be recycled. Containers with hardened remains are residual waste. Containers with liquid remains are special waste and should be disposed at special collecting points according to the locally valid laws on waste disposal. You will find further information regarding the correct disposal on our MSDS. |

Hazardous warning

No labelling required as product is non-hazardous.
Please also follow the instructions on the MSDS.
